DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a human Cyk-4 polypeptide with the amino acid sequence set forth in SEQ ID NO:2 or encoded by a nucleic acid which hybridizes with the nucleotide sequence set forth in SEQ ID NO:1, classified in class 530, subclass 350.
- II. Claim 2, drawn to a murine Cyk-4 polypeptide with the amino acid sequence set forth in SEQ ID NO:4 or encoded by a nucleic acid which hybridizes with the nucleotide sequence set forth in SEQ ID NO:3, classified in class 530, subclass 350.
- III. Claim 3, drawn to an isolated DNA molecule comprising a polynucleotide with the sequence set forth in SEQ ID NO:1, classified in class 536, subclass 23.5.
- IV. Claim 4, drawn to an isolated DNA molecule comprising a polynucleotide with the sequence set forth in SEQ ID NO:3, classified in class 536, subclass 23.5.
- V. Claim 5, drawn to an antibody which is specifically reactive with a human Cyk-4 polypeptide with the amino acid sequence set forth in SEQ ID NO:2 or which is encoded by a nucleic acid which hybridizes with the nucleotide sequence set forth in SEQ ID NO:1, classified in class 530, subclass 387.1.
- VI. Claim 6, drawn to an antibody which is specifically reactive with a human Cyk-4 polypeptide with the amino acid sequence set forth in SEQ ID NO:4 or which is encoded by a nucleic acid which hybridizes with the nucleotide sequence set forth in SEQ ID NO:3, classified in class 530, subclass 387.1.
- VII. Claim 7-11, drawn to methods of identifying a compound capable of modulating cytokinesis, classified in class 436, subclass 64.

Art Unit: 1642

VIII. Claims 12, drawn to a compound for use in cancer therapy, classified in class 424, subclass 184.1, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-II and VII are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the polypeptides of Inventions I-II can be used in the materially different process of affinity purification of antibodies.

The products of Inventions I-VI and VIII have different structures, different chemical compositions, are used for different purposes, and/or have different immunological properties.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and/or their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
